

CENG 2001 - C Programming - Fall 2020

Homework #1

Due date : 9/11/2020 - Before Class

Assignment: Write a program that

1. Draws a triangle using /, \, - characters. Triangle should occupy 5 lines. Use **printf variable formatting**. It should look like

2. Performs 4 arithmetic operations (+, -, *, /) given in the form by the user

variable1 +(or -, *, /) variable2

and displays the output in the form

variable1 + variable2 = result

for example:

7.2 + 3. (Entered by user)

7.20 + 3.00 = 10.20 (Output)

Note: variables in output should have two digit precision.

Notes:

- Do not forget to apply homework submission guidelines.
- You may put both parts' code in the same c file.

Submit:

- Codeblocks project files

Late submission: Sorry, you get no credits!
